MotorMix™ V2.0 EPROM Release

Monroe, Washington -

Announcing - The release of CM Labs MotorMix™ EPROM V 2.0, which allows use of MotorMix™, Dashboard™ and SixtyFour™, to function in piggy back mode and offer 5.1 surround monitoring using Digidesign Protools HD, TDM, Digi 001, Digi 002, Mbox and Protools LE. Cost is \$ 75.00, plus return freight charges via customer selected transit method. New Side Panels may be added for \$ 15.00. For further details contact **mms inc.** To determine the current EPROM version, watch the scribble strip during power up of the MotorMix™. The current version appears in the second screen view.

The upgrade includes:

- 1) Perform Factory Tests to check hardware.
- 2) If no problems found, install new ROM.
- 3) Final test the unit.
- 4) Unit Cleaned with water base spray cleaner and wiped down.
- 5) Unit is bagged and boxed in factory packing material including CD ROM with latest owner's manuals and product literature.

If the unit fails any of the factory tests, the customer will be contacted (via email) with the additional charges to repair the problems.

MotorMix™, is operational with Macintosh OS9, OSX as well as Windows NT, XP, 2000, 98 and 95.

mms inc of Nashville, Tennessee is the worldwide distributor of the CM Labs product line including EQ Magazine's Blue Ribbon Award Winning MotorMix™, DAW control surface with motorized faders; Dashboard™, Digital Editor Worksurface; PM-216™, 16 x 16 Router with 64 memory locations and 2 buss mixer and SixtyFour™, 32 x 32 studio router with level control and 90 memories. CM Labs produces award winning products for the growing Digital Workstation market. Our new products, Dashboard™ and, soon to be released, MotorMate™ complement and expand our popular MotorMix™ controller.

CM Labs Founder and President Carl Malone states "We are very pleased to release V 2.0 and proud to be associated with **mms inc.** They have a long standing excellent reputation in the Pro Audio business and we are looking forward to an exciting collaboration."
